

L.O.V.E.™

**Stay Private.**  
**Stay Connected.**  
**Global Satellite Phone Service.**

POWERED BY L.O.V.E. SECURE OS™

L.O.V.E. Encrypted Global Satellite Phone™ Service & Fast Satellite Internet.

# L.O.V.E.™ Puts You In Control

L.O.V.E.™ is a revolutionary telecommunications provider that boasts worldwide satellite network coverage and encrypted smartphones, which connect people over a peer-to-peer decentralized internet.

## Protects Your Digital Assets

L.O.V.E.™ smartphones are fully encrypted and offer full anonymity using the proprietary L.O.V.E.™ Secure OS. Your information is never collected, shared or sold.

## Hotspot Internet Everywhere

Share internet without borders using The L.O.V.E. Phone™'s Satellite hotspot feature.

## Borderless Connection

No more roaming costs! Be covered around the world via the private L.O.V.E.™ satellites interchangeability and couple with the strongest 4G and 5G networks.

# Private, Secure, Compatible, and Scalable

L.O.V.E. Secure OS™ is an encrypted mobile operating system that simplifies the cutting edge of technology and upgrades the user experience to easy buttons, while providing cross-compatibility for everyone's apps.

## Ultimate Crypto Security

Traders, developers and investors Rely on L.O.V.E.™ encrypted smartphones to ensure absolute security for investment holdings and wallet apps.

## 3rd Party Compatible

L.O.V.E.™ App Marketplace features the latest trending apps and is compatible with most 3rd party apps that you already love.

## Encrypted Communications

L.O.V.E. Secure OS™ and The L.O.V.E. Phone™ itself, is purpose-built to keep communications secure. Your digital privacy is protected with blockchain encryption, including all calls and text messages.

## Scalable

The L.O.V.E.™ Phone, and L.O.V.E.™ products deliver customized solutions that can be scaled to meet your operational needs.

L.O.V.E.™

# Military-Grade Encryption

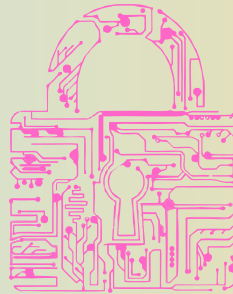

**L.O.V.E.™ Secure OS™ provides a closed-loop and unparalleled level of security to the entire phone experience.**

## Tiered Security

L.O.V.E.™ Secure OS™ gives closed-loop security from the boot up process to visiting the internet; everyday operations and mission-critical tasks are secured with true end-to-end protection.

## Peer-to-Peer Secured Communication

L.O.V.E.™ Secure OS™ protects conversations within a key by key encryption-interlaced messaging system, and messages individually within blockchain, just to ensure every message is safe.

## Ironclad Data Vault

L.O.V.E.™ Secure OS™ provides a military-grade, password protected data storage vault, where any type of sensitive data can be safely stored.

## L.O.V.E.™ Ecosystem Apps

Each L.O.V.E.™ Phone™ is preloaded with useful apps, including a free custom VPN, and the highly secured internet browser called L.O.V.E.™ NET™.

L.O.V.E.™

# L.O.V.E.™ PRODUCTS

POWERED BY L.O.V.E. SECURE OS™

L.O.V.E. Encrypted Global Satellite Phone™ Service & Fast Satellite Internet.

# L.O.V.E. Secure Os™

The military-grade encrypted satellite smartphone operating system that safeguards your digital privacy, while providing global connection (borderless).

## Full Encryption

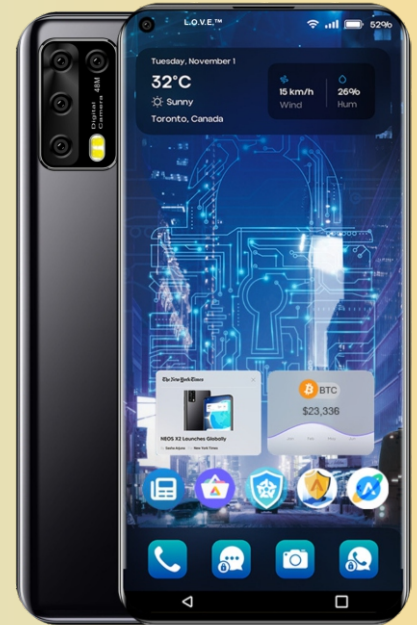

L.O.V.E.™ Encrypted Smartphones offer freedom from data selling centralized big tech phone options, and removes your boarders! Enjoy \$0 roaming fees, secured calls and messages, and a private internet that's available, even in the jungle.

## L.O.V.E.™ Secure OS

L.O.V.E.™ Encrypted Smartphones are built on the proprietary L.O.V.E.™ Secure OS, a privacy centric, custom operating system which keeps your information and digital assets secure. It's not android; so there's no backdoor to pull data through.

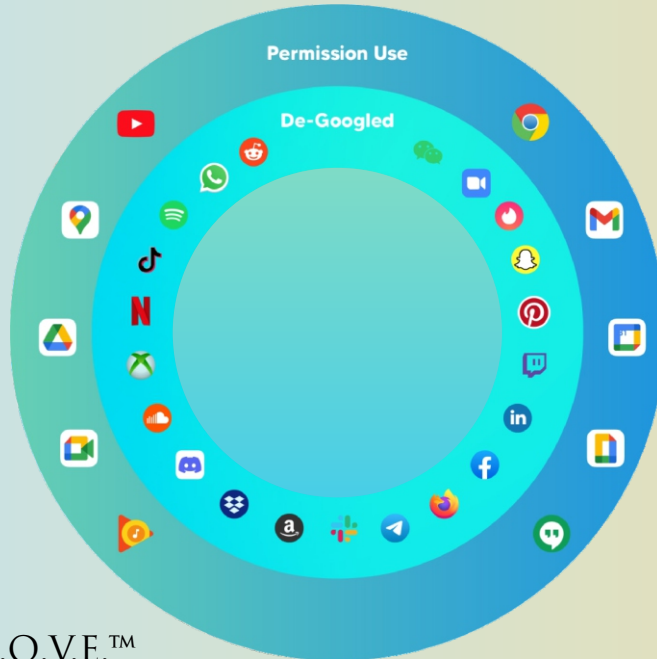

## All Your Favorite Apps

L.O.V.E. Secured OS™ allows you to download and use all of your favorite apps. The L.O.V.E. Phone is compatible with over 60,000 of the most popular applications, including YouTube, Netflix and more. No user behavior change is required.

# L.O.V.E.™ Secure Os™

The custom-built operating system that offers security without compromise.

## Maximum Security

L.O.V.E.™ Secure OS™ protects your device with elite system-level hardware encryption.

## Secure 3rd Party Applications

Access your favorite apps and services while controlling exactly how they interact with your device and your data.

## Control Your Permissions

If you want to prioritize convenience over privacy, you can easily adjust permissions based on your needs.

# L.O.V.E.™ Encrypted Satellite Smartphone v1.0 Specs
